DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to isolated nucleic acids encoding a portion of a CREB binding protein (CBP) that binds to CREB, classified in class 536, subclass 23.5.
 - II. Claim 9, drawn to a fragment of a CBP that binds to CREB, classified in class 530, subclass 350.
 - III. Claim 10, drawn to an antibody that binds to a portion of a CBP that binds to CREB, classified in class 350, subclass 387.1.

The inventions are distinct, each from the other because of the following reasons:

2. The inventions of Groups I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions relate to different compounds, each of which has a different mode of operation, and performs a different function.

Conclusion

3. Because these inventions are distinct for the reasons given above, have acquired a separate status in art because of recognized divergent subject matter and different classifications, and because the literature and sequence searches required for any one of the groups is not required for the others, restriction for examination purposes as indicated is proper.
